DOCKET FILE COPY ORIGINAL

Dear Sir:

On behalf of WCPX License Partnership, licensee of Television Station WCPX-TV, Orlando, Florida, and in connection with WCPX License Partnership's Petition for Reconsideration of the Initial Decision of Administrative Law Judge Joseph Chachkin granting the above-captioned application and its Petition to Intervene in MM Docket No. 94-88, filed with the Commission on April 19, 1995, we submit herewith the original Engineering Statement of Charles A. Cooper of the engineering firm of duTreil, Lundin & Rackley, P.C. for association with Exhibit B to the Petition for Reconsideration and Exhibit B to the Petition to Intervene. The Engineering Statement includes a supporting Affidavit from Mr. Cooper that was not included in the April 19 filings.

ENGINEERING STATEMENT  
CONCERNING THE APPLICATION OF  
COMMUNITY EDUCATIONAL ASSOCIATION  
NEW NON-COMMERCIAL RADIO STATION  
HOLLY HILL, FLORIDA

Prepared for  
Station WCPX-TV  
WCPX License Partnership  
Orlando, Florida

This Engineering Statement has been prepared on behalf of WCPX License Partnership, licensee of station WCPX-TV on channel six (82-88 MHz) at Orlando, Florida. It concerns the application (BPED-930316MF, amended) filed by Community Educational Association for a new FM non-commercial radio station at Holly Hill, Florida (herein "Holly Hill"). It is demonstrated herein that the proposed facility will cause impermissible levels of interference to WCPX-TV as determined according to Section 73.525 of the FCC Rules.

The Holly Hill application specifies operation from a site located on Route 40 in Flagler county, Florida. It is proposed to operate as a class A facility on channel 201 (88.1 MHz) with a vertically only polarized effective radiated power (ERP) of 2 kilowatts (kW) and an antenna radiation center height above average terrain (HAAT) of 58 meters. The proposal has been studied according to the criteria set forth in Section 73.525 of the Commission's Rules to determine the level of interference that is expected to occur to viewers of WCPX-TV.

Since vertical-only polarization is proposed with a nominal ERP of 2 kW, an equivalent horizontally

Page 2  
Holly Hill, Florida

polarized ERP of 0.05 kW was determined according to Section 73.525 (e)(4)(i) using an adjustment figure of 40 for calculation purposes. The distances to the appropriate interfering contours were calculated using terrain averages obtained from the National Geophysical Data Center (N.G.D.C.) 30-second computer database. It is noted that the 6 dB adjustment was not employed to determine the interfering contour as directed by Section 73.525 (e)(4)(i) of the Commission's Rules. The WCPX-TV protected contours were determined based on terrain data extracted from the N.G.D.C. 30-second computer database. All distances to coverage and interfering contours were calculated at ten degrees intervals using the pertinent directional antenna relative field values for both Holly Hill and WCPX-TV.

The proposed Holly Hill transmitter site is located 76 kilometers from WCPX-TV at a bearing of 353 degrees true. To determine the predicted interference area to WCPX-TV from Holly Hill, the value of the WCPX-TV coverage contours and the associated Holly Hill interfering contours were interpolated from Figure 1 shown in Section 73.599. The WCPX-TV coverage contour values, Undesired-to-Desired (U/D) ratios, and Holly Hill interference contour values are tabulated below:

WCPX-TV Coverage Contour (dBu)	Undesired-To-Desired Ratio (dB)	Holly Hill Interfering Contour (dBu)
64	-4.0	60.0
63	-4.0	59.0
62	-3.5	58.5
61	-3.5	57.5

Page 3  
Holly Hill, Florida

WCPX-TV Coverage Contour (dBu)	Undesired-To- Desired Ratio (dB)	Holly Hill Interfering Contour (dBu)
60	-3.0	57.0
59	-2.5	56.5
58	-2.5	55.5
57	-2.0	55.0

As can be seen above, for each integer increment in the WCPX-TV contour value, the associated D/U ratio was interpolated to the nearest one-half decibel value. The predicted interference area was then calculated as the area bounded within the WCPX-TV and Holly Hill contour locus intersections.

The Holly Hill predicted interference area to WCPX is projected onto Figure 1 which shows the 1990 Census Florida County Outline subdivisions and cities. The Holly Hill applicant claims that 3,000 persons are predicted to receive interference to WCPX-TV (see Exhibit #9, footnote 3 in the Holly Hill application). The applicant also pledges to install 150 radio-frequency filters in order to decrease the number of affected persons pursuant to Section 73.525(c)(2). However, our analysis demonstrates that greater than 4,000 persons are predicted to receive interference, which is prohibited by the Commission.

Using the Commission's uniform distribution method, described in Section 73.525(e)(2), of determining the population contained in the interference area, the population encompassed by the interference area is

***du Treil, Lundin & Rackley, Inc.***

A Subsidiary of A. D. Ring, P.C.

Page 4  
Holly Hill, Florida

calculated to be 4,238 persons as shown on Figure 2; the supporting Census population and area values are tabulated on Figure 3. This value is 238 persons over the maximum threshold assuming 1,000 radio-frequency filters are installed on television receivers located within the predicted interference area. If filers are not installed by the applicant, than the impermissible value is 1,238 persons over the maximum threshold of 3,000 persons.

It is concluded that the Holly Hill facility will result in predicted interference to viewers of WCPX in excess of that permitted by the FCC Rules.

Charles A. Cooper

AFFIDAVIT

County of Sarasota                            )  
    ) ss  
State of Florida                            )

I, Charles A. Cooper, do hereby declare under penalty of perjury that:

1. I am a broadcast engineer employed by the engineering firm of du Treil, Lundin & Rackley, Inc., consulting radio engineers, with offices located at 240 N. Washington Blvd., Suite 700, Sarasota, Florida 34236.
2. I have filed numerous documents with the Federal Communications Commission concerning broadcast matters.
3. The foregoing Engineering Statement and attached documents in support of the Petition for Reconsideration and Petition to Intervene of WCPX License Partnership are true and correct to the best of his knowledge and belief.

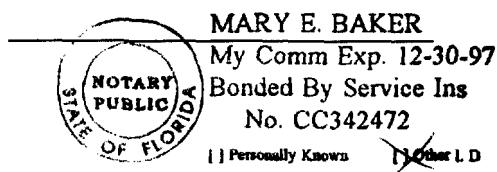

Dated this the 20th day of April, 1995.
